## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-14 are rejected under 35 U.S.C. 102(a) as being anticipated by Hayakawa et al. (Tetrahedron, 59, 2003, 6465-71).

Hayakawa et al. disclose methods of making cyclic bisdinucleosides via condensation reactions with the same intermediates instantly claimed. See Scheme 1, page 6466. It is noted that instantly claimed intermediates represented by formulas 5 and 6 are seen to be anticipated by compounds 3 and 4 from scheme 1 respectively. The compound of formula 1 of the instant application is seen to be anticipated by compound 2 of scheme 1.

Applicant cannot rely upon the foreign priority papers to overcome this rejection because a translation of said papers has not been made of record in accordance with 37 CFR 1.55. See MPEP § 201.15.
